April / May 2016

## Background

The Florida Department of Transportation (FDOT) began **January 14, 2013** to replace the series of overpasses that carry traffic over Hendricks, Kings and Montana avenues along 2.3 miles of I-95 near downtown Jacksonville in Duval County. Known as the Overland Bridge Replacement project, it will improve traffic flow along the I-95 corridor just south of the Fuller Warren Bridge. I-95 will be widened to provide an additional lane for southbound traffic. As the project is built, traffic will use parallel roadways, which upon completion of the I-95 bridge structures will remain and provide additional capacity for traffic between the Fuller Warren Bridge and north of Emerson Street.

## Current Activities

**April through May 2016** scheduled project activities include:

- Installing drainage along Atlantic Boulevard
- Placing embankment and constructing retaining walls in the Atlantic Boulevard/ Philips Highway area
- Placing embankment and constructing retaining walls along I-95 northbound at the FEC Bridge
- Demolishing bridge deck overhangs at the Fuller Warren Bridge
- Construction of ramp which will take traffic from Atlantic Boulevard to I-95 in the future
- Placing new beams and decking for the Fuller Warren Bridge widening
- Constructing bridges for I-95 northbound and southbound at US-1 / Philips Highway
- Installing signals and lighting throughout project areas

## Upcoming Milestones

- I-95 southbound traffic will be shifted to the southbound access road (May 2016)
- Work along Louisa Street will be completed
- The US-1 / Philips Highway exit ramp from I-95 southbound will reopen (May 2016)

## Did You Know?

According to the Florida Department of Transportation

- Florida has 12,225 bridges with 11 'major' bridges located in Duval County
- Florida has 122,392 highway miles
- There were almost 100 million tourists in 2015; 49.6% of whom came to Florida using the highway system
- Northeast Florida is home to more than 1.9 million residents in 18 counties
- Motorists traveling the state highways in Northeast Florida log more than 43.2 million miles daily

## Frequently Asked Questions

### When is construction expected to end?

Approximate completion will take place early 2017.

### • How much does this project cost and how is it funded?

The total construction cost of approximately \$160 million comes from a combination of state and federal funds.

## Project Partners

The Overland Bridge Replacement Project is being completed in partnership with:

- FDOT District Two
- Archer Western Contractors, Inc. of Tampa (Contractor)
- RS&H, Inc. of Jacksonville (Designer)
- Eisman & Russo, Inc. and KCCS of Jacksonville
